The Web Presence of Our Schools

Unlocking the Potential of School Websites

How to Effectively Manage Maryland's 5-Star Public Charter Schools' Websites

———

Mete Bayram | Webmaster/IT Specialist
mbayram@clfmd.org

Our Role

as IT Professionals

Our role as IT professionals is integral to ensuring that the schools' **digital presence** is not only **functional** but also serves as an **effective communication** and **information hub**.

The School Website

as a Vital Hub

When utilized efficiently, the school website serves as the **primary point of contact** for students, parents, and staff, offering crucial information about **upcoming events, valuable resources, and important announcements**.

Archive

but Why?

Regularly publishing posts and news updates **keeps stakeholders informed and engaged, fostering a sense of community and transparency**. Moreover, keeping data organized in the archive ensures that **historical information remains accessible and useful, whether for compliance, reference, or reporting purposes.**

Elevating

School Community and Resources

In essence, **our efforts in website management** directly impact the school's ability to **communicate, engage, and provide valuable resources**, ultimately **contributing to a positive educational environment**.

Live/Production Website

A **live/production website** is the publicly accessible and fully operational version of a website that is available to users on the internet. It is the website that visitors interact with, view, and use for its intended purposes.

Any updates or changes intended for a live website are typically first tested in a **staging environment/website** to identify and resolve any issues before being deployed to the live site. This helps ensure the stability and reliability of the production website and minimizes disruptions for users.

Our Schools' Live/Production Websites

Who Has Access?

CSP Elementary School **fcan@mycsp.org**

CSP Middle/High School **it@mycsp.org**

CMIT Academy North Elementary School **it@cmitelementary.org**

CMIT Academy North Middle School **cgardner@cmitacademy.org**

CMIT Academy North High School **etekin@cmitacademy.org**

CMIT Academy South Elementary School **it@cmitsouthes.org**

CMIT Academy South Middle/High School **it@cmitsouth.org**

Staging Environment/Website

A **staging website/environment** is a separate and isolated copy of a website that is used for testing and quality assurance purposes before changes or updates are applied to the live or production website.

Staging websites are commonly used in web development and web management workflows to ensure that modifications, such as code updates, design changes, or new features, do not negatively impact the **live/production website**'s functionality or user experience.
